Unmatched Strength, Unrivaled Cutting Makes SS White® the #1 Choice of Dentists.

Offers Valid July 1, 2024 - September 30, 2024

BUY 4 GET 1 AT NO CHARGE**

**Can mix and match to equal or lesser value • NO CHARGE PRODUCT TO EQUAL OR LESSER VALUE

CHOOSE FROM: BONE CUTTERS, ZEKRYA, T10 AND THE NEW TRIMMING & FINISHING BURS (7283, 48L-010 AND 48L-012)

SS White® Dental Bone Cutters are Strong and Stand Up to the Rigors of Dental Surgery!

- Exceed ISO specifications for neck strength by over 90% reducing the occurrence of breakage*
- Designed for precise trimming and preparation of hard tissue, bone structure, bone lid and apicoectomy procedures
- Sectioning impacted third molars prior to extraction, separating roots, removal of fractured root stump and external sinus lift procedures
- Ultra-smooth vibration free cutting
- The crosscut shape and external flute depth ensures efficient cutting and expels waste material

151-Z and 151L-Z (Zekrya) Bur provides exceptionally smooth cutting and greater efficiency for surgical procedures.

Zekrya Bur features a 6 helical bladed cutting edge design and solid carbide construction which delivers exceptional concentricity and reduced vibrations. SS White® Zekrya Burs provide superior cutting performance for oral surgery procedures including sectioning wisdom teeth, separating roots and removing broken root stump. Zekrya Burs can also be used endodontically to reduce cusps on molars to create easy endodontic access.

T-10 Metal Cutting Burs for crown removal.

With an improved design of the TriHawk Talon 10 Bur, the SS White® T-10 burs offer greater cutting efficiency and increased durability. The T-10 Bur can cut vertically as well as horizontally, making it ideal for use in procedures where access is limited. Use the T-10 for metal cutting, cavity prep, crown removal as well as creating endodontic access.

12-Blade Finishing Burs

SS White® 12 Blade trimming/finishing bur with premium quality solid tungsten provide faster and smoother cutting. Twelve bladed finishing burs provide a smooth finish on composite, amalgam, enamel and dentin. The flame shape of the 48L and 283 make these burs ideal bur for use in orthodontic debonding procedures. Carbide finishing burs create a smoother surface finish on most dental materials when compared to diamond instruments.
